

# PROLAN MEDIUM 170

MULTIFUNCTIONAL with **Extreme penetration capabilities**

## Applications

- ProLan Medium is **Extreme as a rust loosener** while both lubricating and protecting your small tasks from corrosion.
- ProLan Medium **penetrates metal**, giving it an adhesive transparent and waxy/lanolin film.
- ProLan **stops existing corrosion** – the surface turns brown after treatment. Its lanolin content stops oxygen from reaching the surface.
- NSF International Food-Grade, **class H1**.
- ProLan products are **NATO-approved**
- ProLan Medium is electrically and electrolytically **separating up to 70 kV** and therefore provides optimal protection for all electrical installations in dry and damp environments.
- ProLan **withstands 170-bar high-pressure cleaning** after drying and is insoluble in water.
- Resistant to acids, salts, fertiliser and corrosive elements in general.
- Does not damage glass, enamel or treated surfaces in general and has a **transparent surface**.
- ProLan Medium can be removed from surfaces with odourless kerosene or similar.
- ProLan Medium is **UV-resistant** for up to 24 months.

## ProLan Medium 170 is ideal for

- Bolts in general – moving joints – doors, hinges, windows – protection of electrical plugs
- Light rust protection in general – chain spray – landscaping machinery – onshore/offshore
- Means of transport – metal industry – transport equipment – bicycles – mopeds – motorcycles
- Landscaping machinery – garages – industry – chains – forklift trucks – industrial machinery
- Outboard engines – horticulture – installation of hydraulics – loosening of nozzles and spark plugs in cars
- ProLan Medium is an **all-round natural product** with thousands of applications.
